Last year, I lost my mom. I did not have the chance to renew while I was busy taking care of her. After 14 years of holding a CT license and doing only consults there, I decided it was not necessary. My work is national now, and I need only one license to do consults.

This may be a shocking clarification: we actually keep with the Goldwater rule in the book! Every major (some very prominent) psychiatrist--as well as specialist lawyers--agrees we kept with ethical guidelines. Only those who haven't read it disagree!

No, not at all. It is because it is an emergency. Mr. Trump himself deserves care, not enabling of a malignancy. I know the two are hard to tell apart. The openness is because of his being in such a public office. It is extremely unfortunate, I agree.
